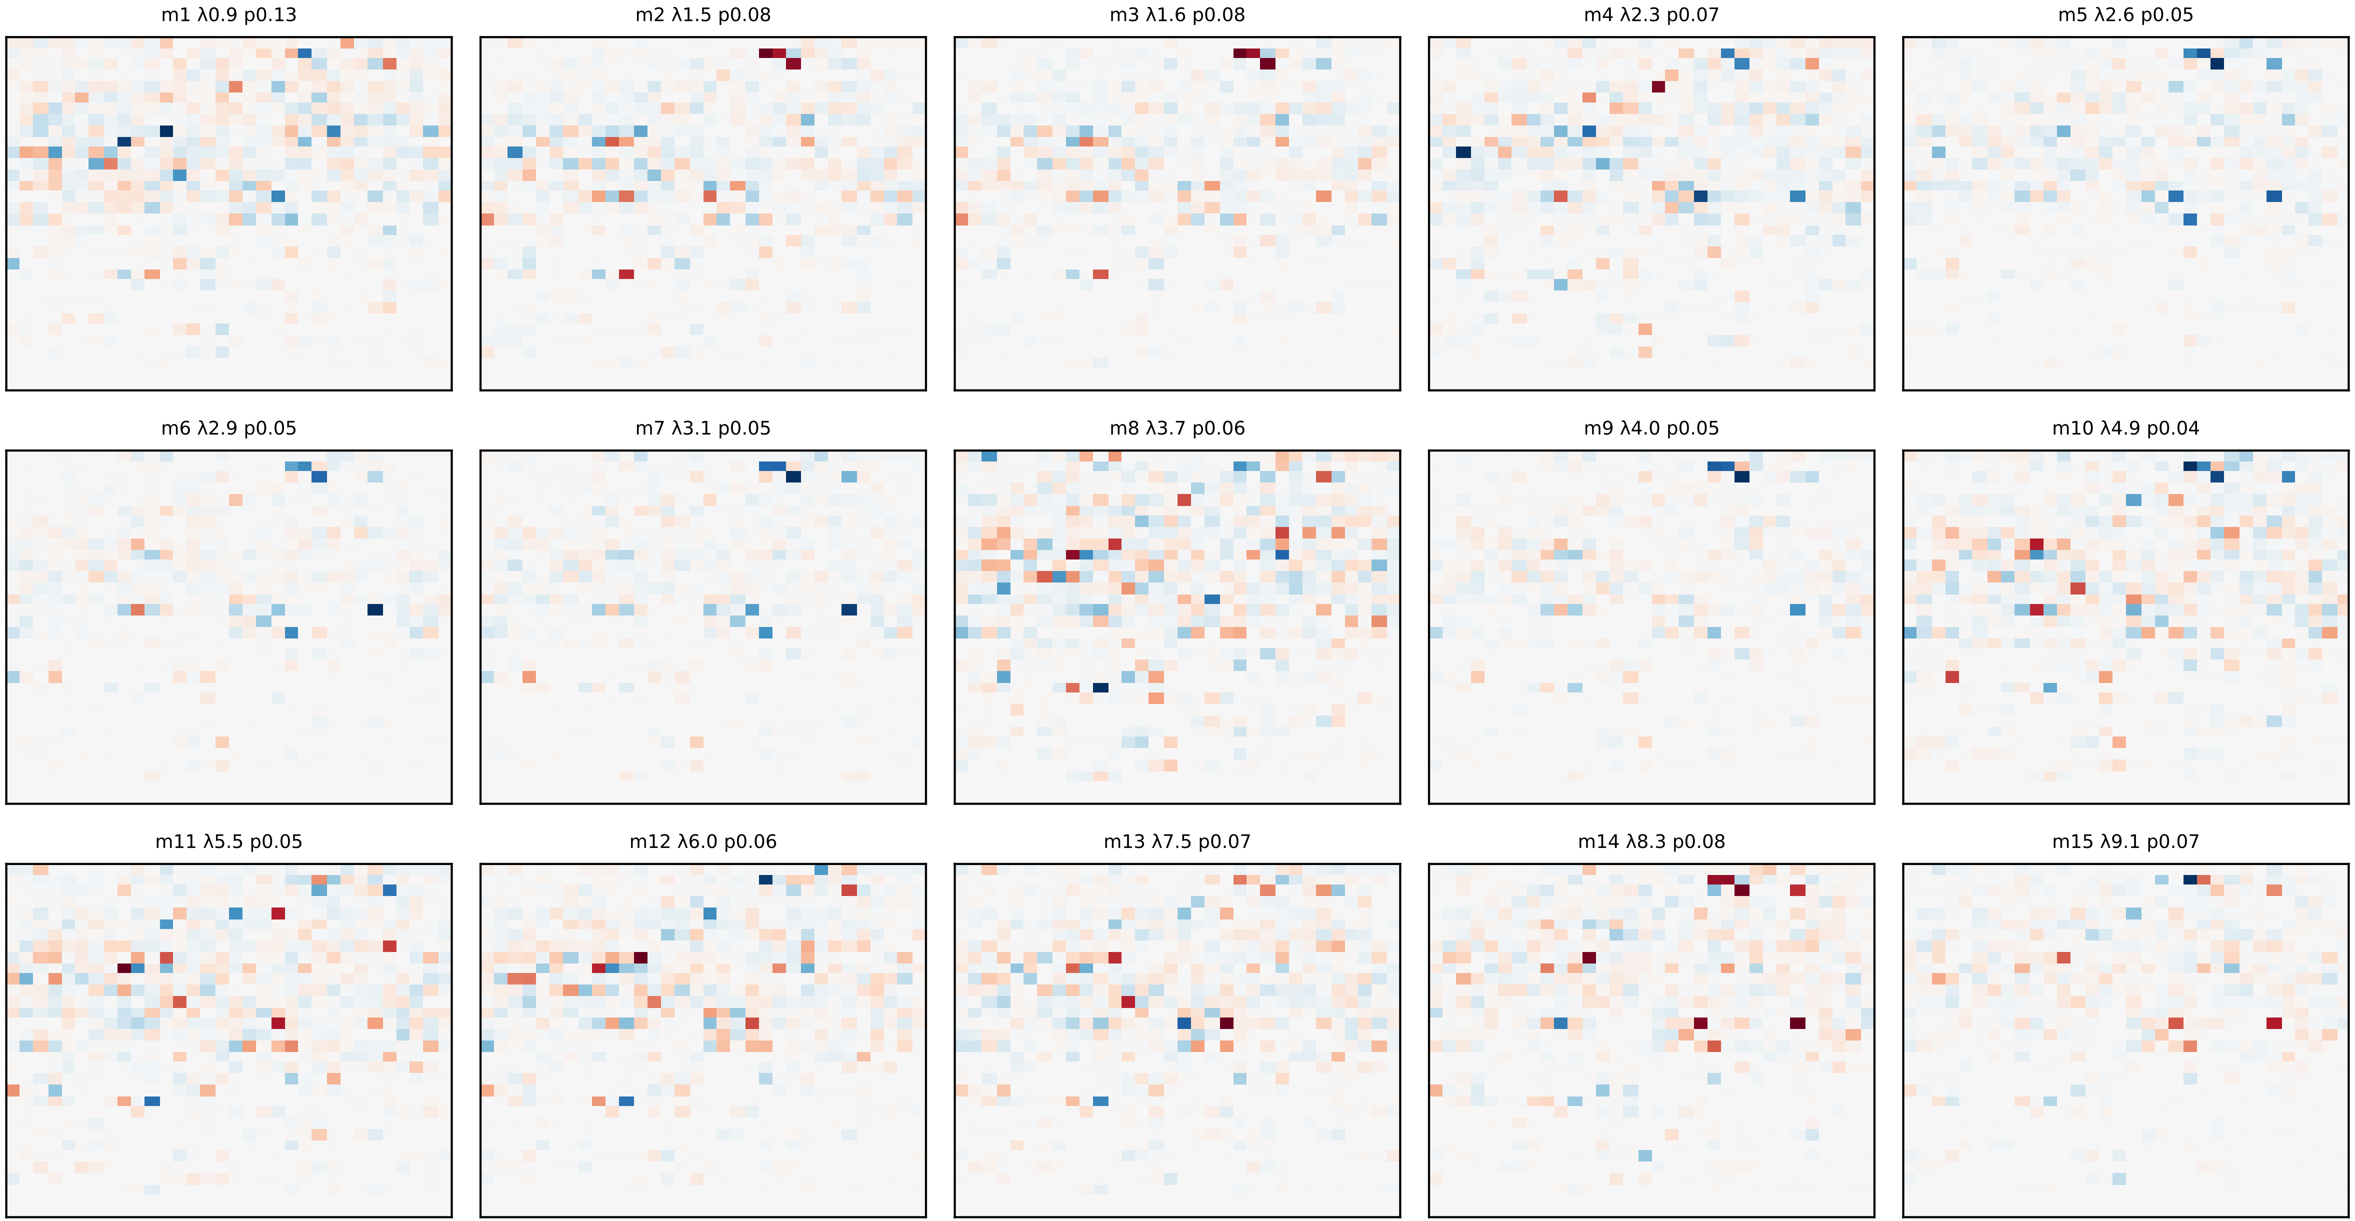
Llama er_random: single-head damage per eigenmode (red=head builds it)



```
Llama — er_random:  which heads build which structure

CIRCUIT 1  —  high-freq (no simple name) / mid-freq (no simple name)
    modes [13, 12, 8] (λ 7.5, 6.0, 3.7),  total power 0.19
    top heads: L14H19, L12H12, L8H11, L9H8, L2H26

CIRCUIT 2  —  low-freq (no simple name)
    modes [4, 5, 7] (λ 2.3, 2.6, 3.1),  total power 0.17
    top heads: L4H16, L14H9, L5H11, L13H0, L6H13

CIRCUIT 3  —  low-freq (no simple name)
    modes [3, 2] (λ 1.6, 1.5),  total power 0.17
    top heads: L1H20, L2H22, L1H21

CIRCUIT 4  —  high-freq (no simple name)
    modes [14, 15] (λ 8.3, 9.1),  total power 0.15
    top heads: L14H26, L2H22, L8H11, L14H19

CIRCUIT 5  —  low-freq (no simple name)
    modes [1] (λ 0.9),  total power 0.13
    top heads: L2H27, L11H7, L4H16

CIRCUIT 6  —  mid-freq (no simple name)
    modes [9] (λ 4.0),  total power 0.05
    top heads: L14H9, L8H9, L1H22

Circuit 1 vs Circuit 2 cross-correlation: -0.17  (≈independent)
```
