

A heatmap showing the evolution of the average number of nodes in the largest component over 15 rounds for different initial conditions. The x-axis is labeled 'round j' and ranges from 0.0 to 15.0. The y-axis represents different initial conditions, with labels at the bottom: 0.0, 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, 1.0, 1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 1.7, 1.8, 1.9, 2.0. The color scale ranges from 0.0 (dark blue) to 1.0 (dark red), with intermediate values in shades of purple, pink, and orange. The plot shows that for initial conditions greater than 1.0, the average number of nodes in the largest component remains relatively stable around 1.0. For initial conditions between 0.0 and 1.0, the average number of nodes in the largest component decreases over time, reaching a stable value around 0.5 after approximately 5 rounds.
