

context ≈ 10 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 14.3% of variance

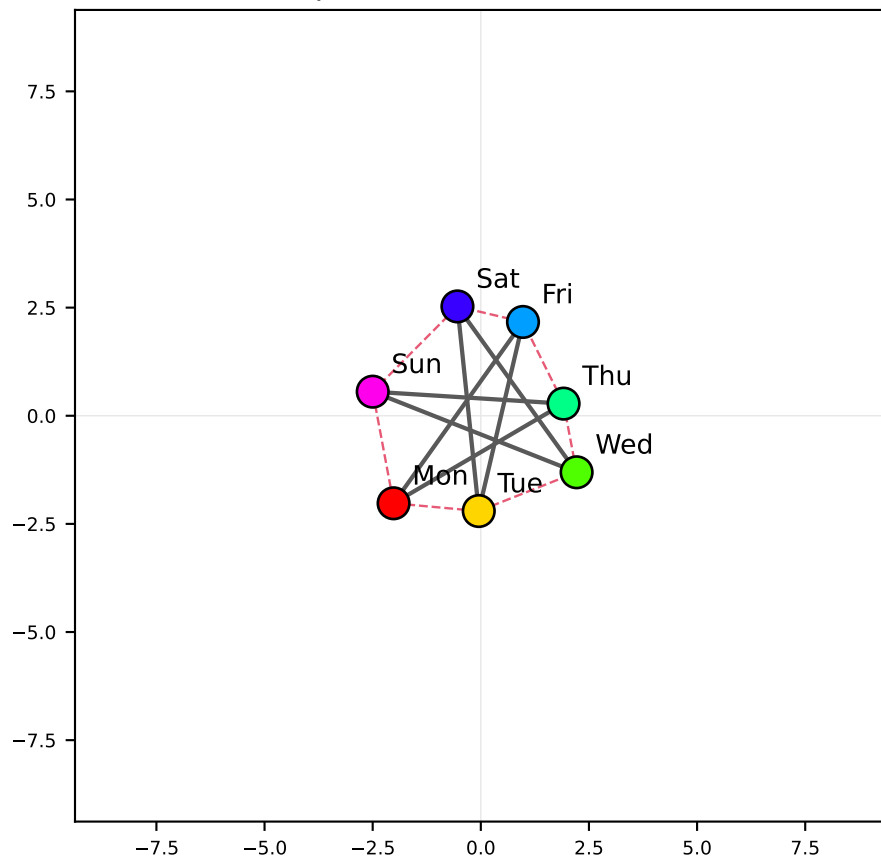

FINAL learned plane (fixed) — 25.4% of variance

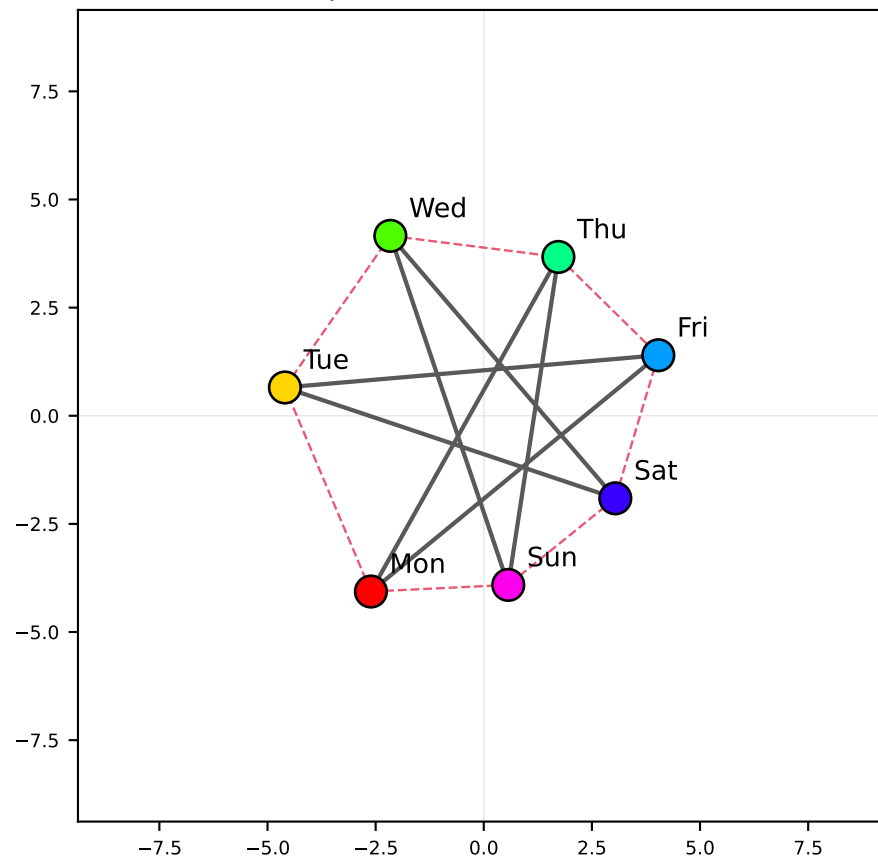

context ≈ 20 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 11.2% of variance

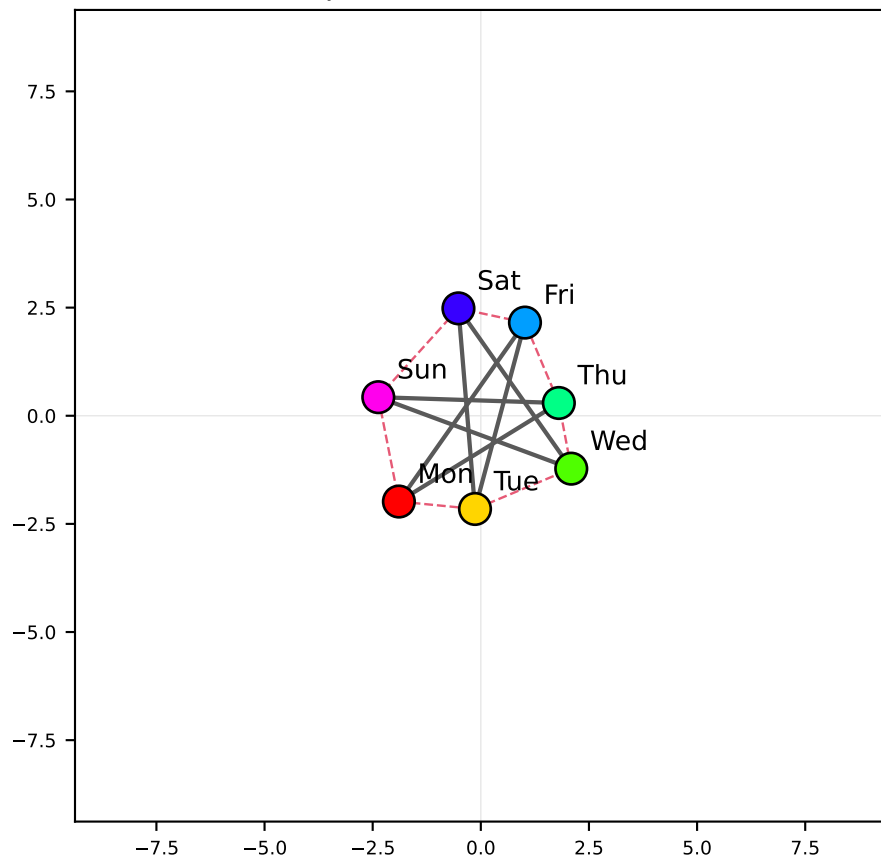

FINAL learned plane (fixed) — 34.5% of variance

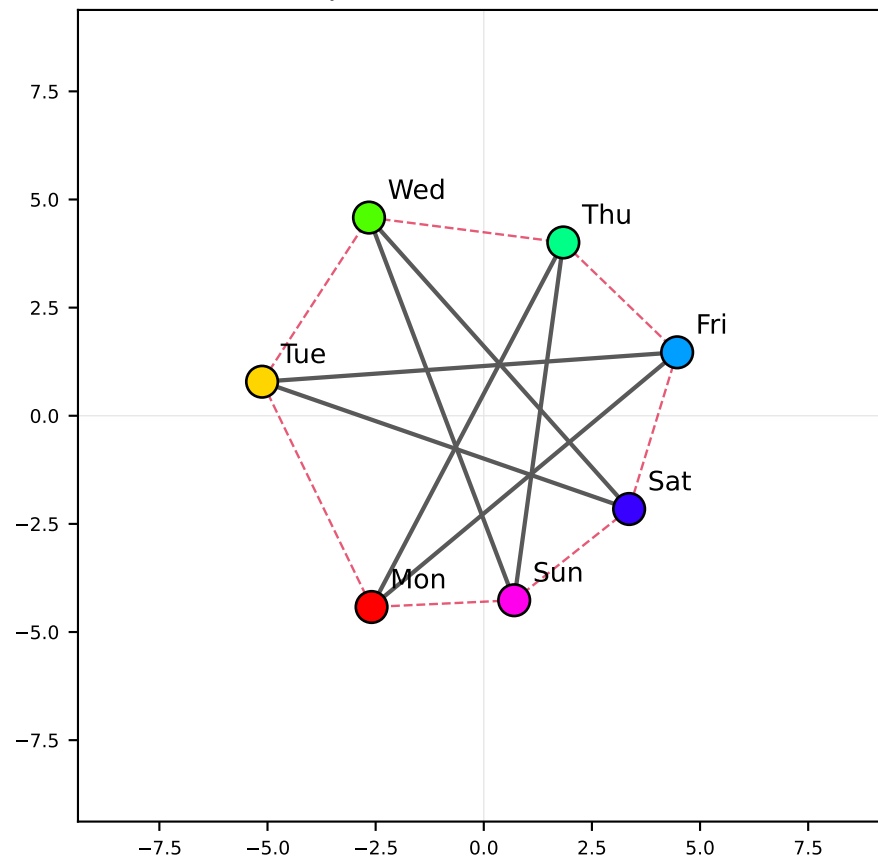

context $\approx$ 30 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 9.7% of variance

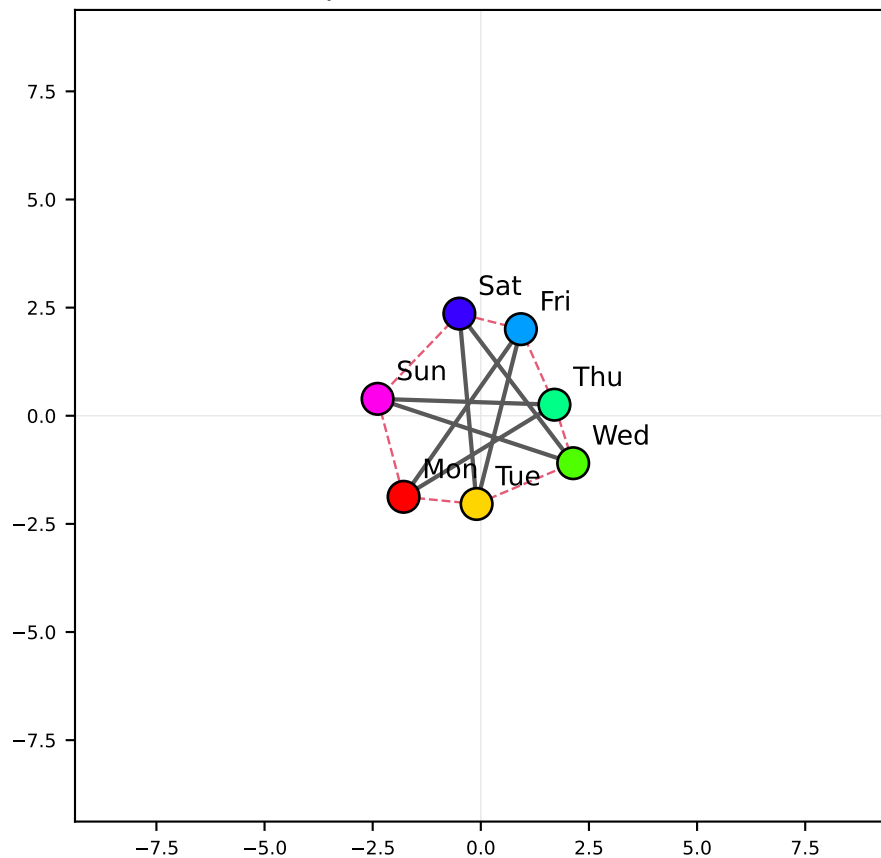

FINAL learned plane (fixed) — 38.9% of variance

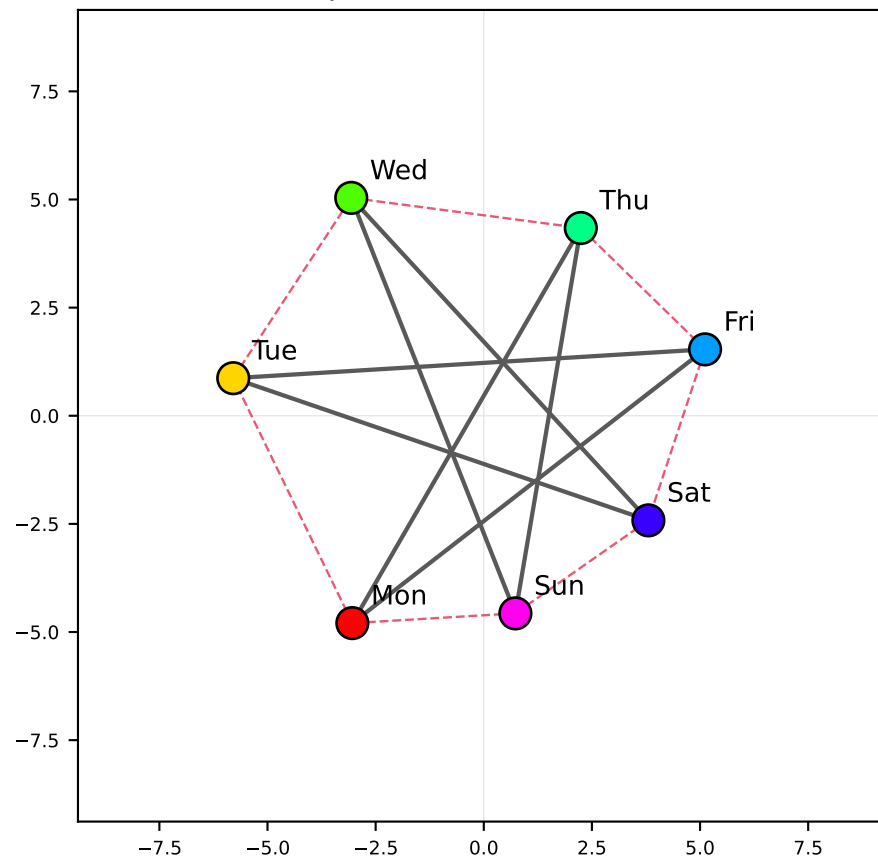

context $\approx$ 50 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 8.0% of variance

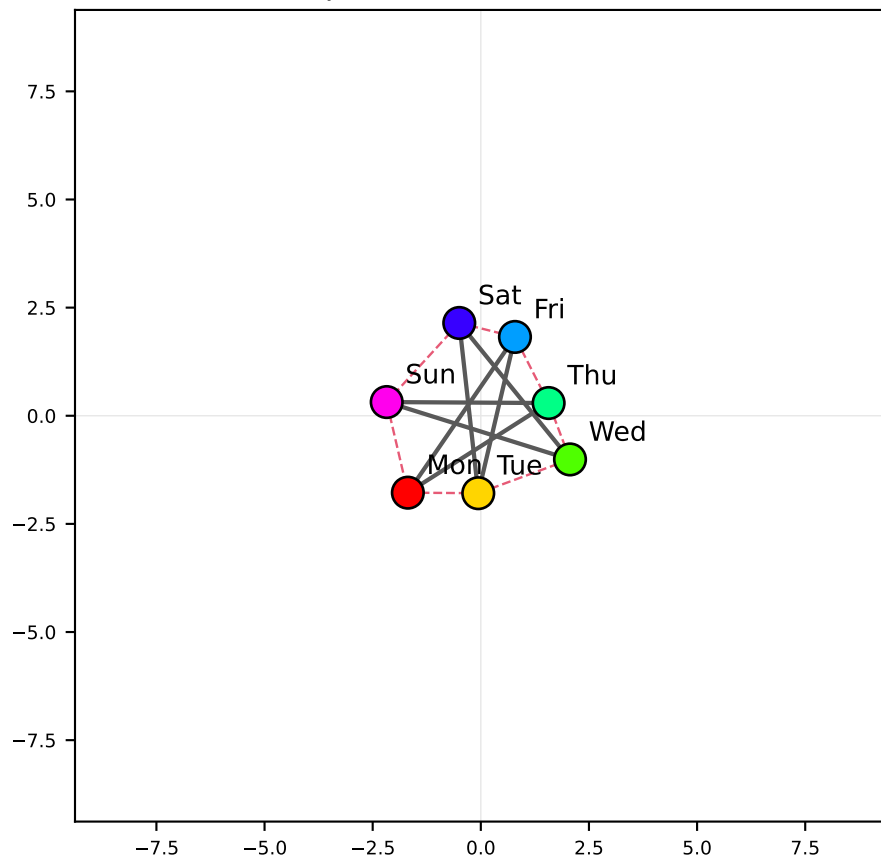

FINAL learned plane (fixed) — 43.4% of variance

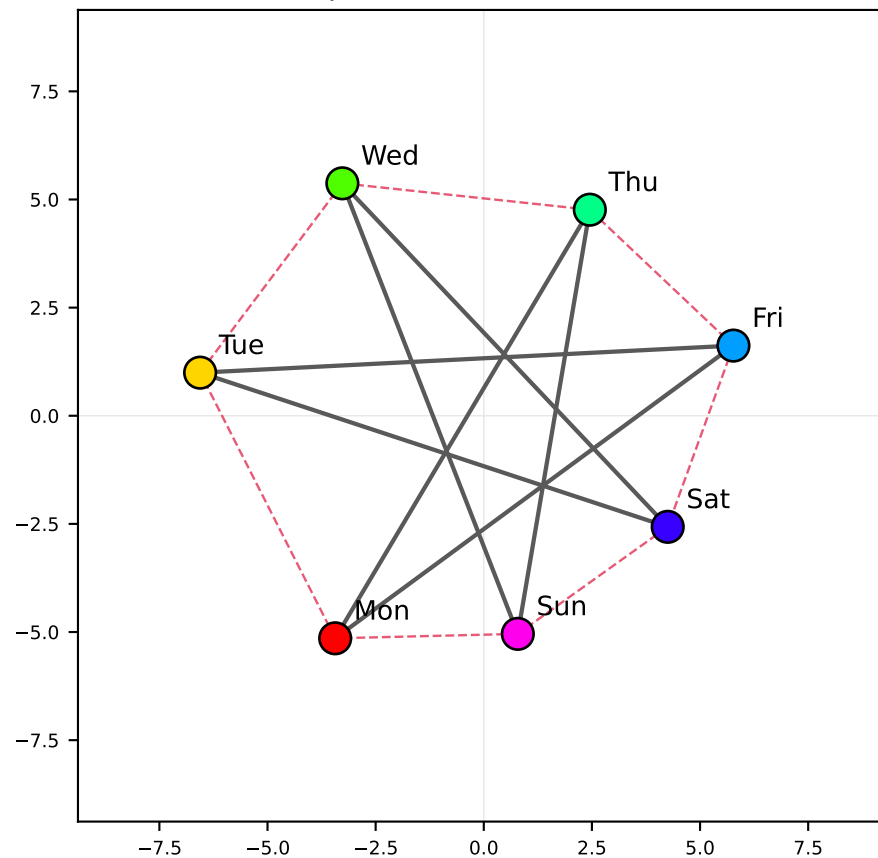

context $\approx$ 75 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 6.2% of variance

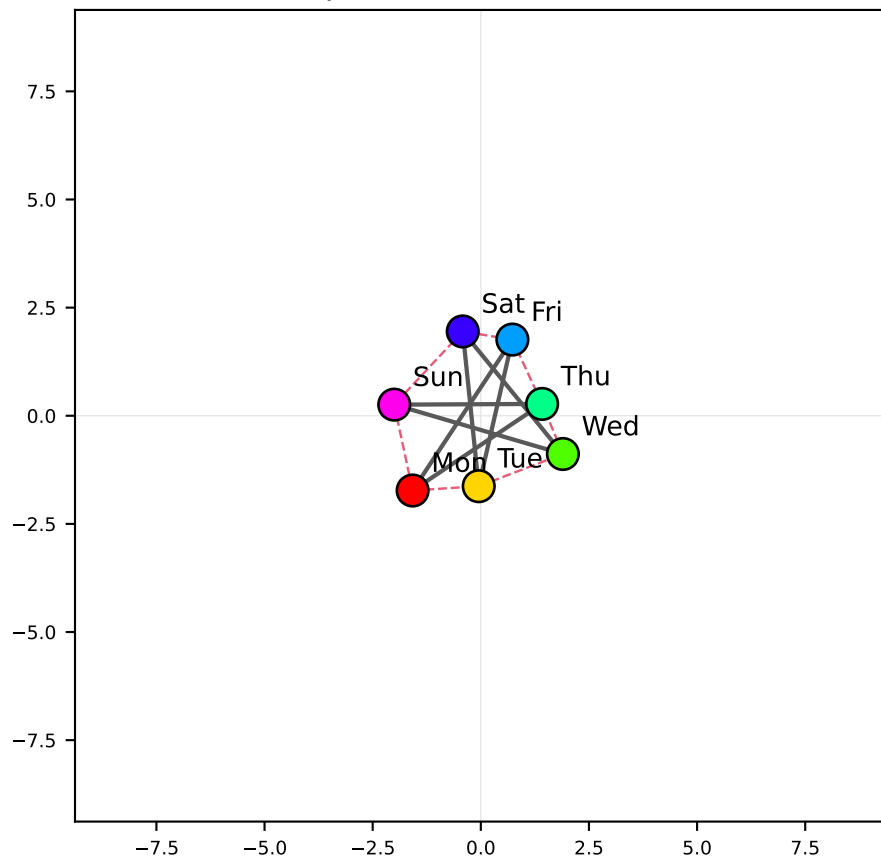

FINAL learned plane (fixed) — 47.9% of variance

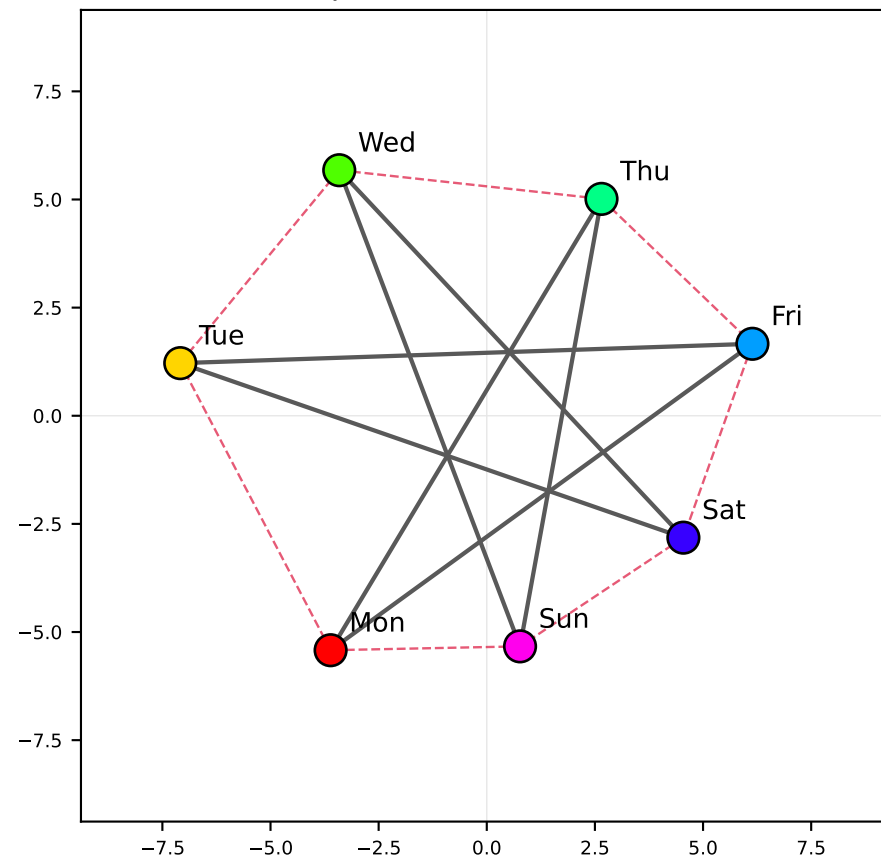

context ≈ 100 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 5.0% of variance

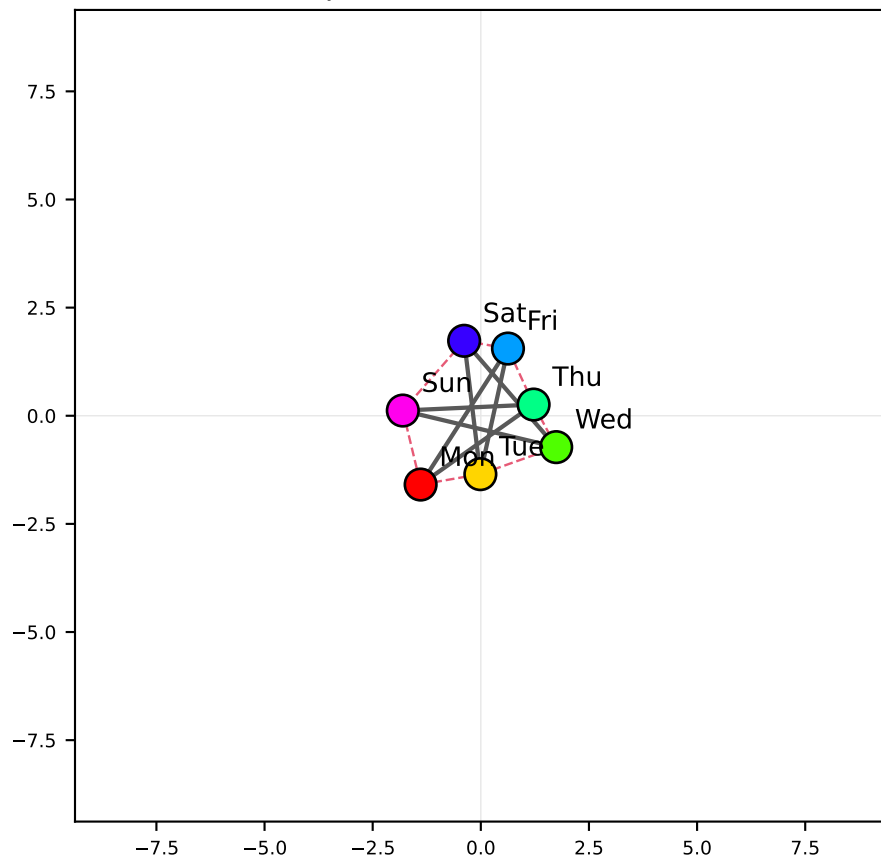

FINAL learned plane (fixed) — 50.7% of variance

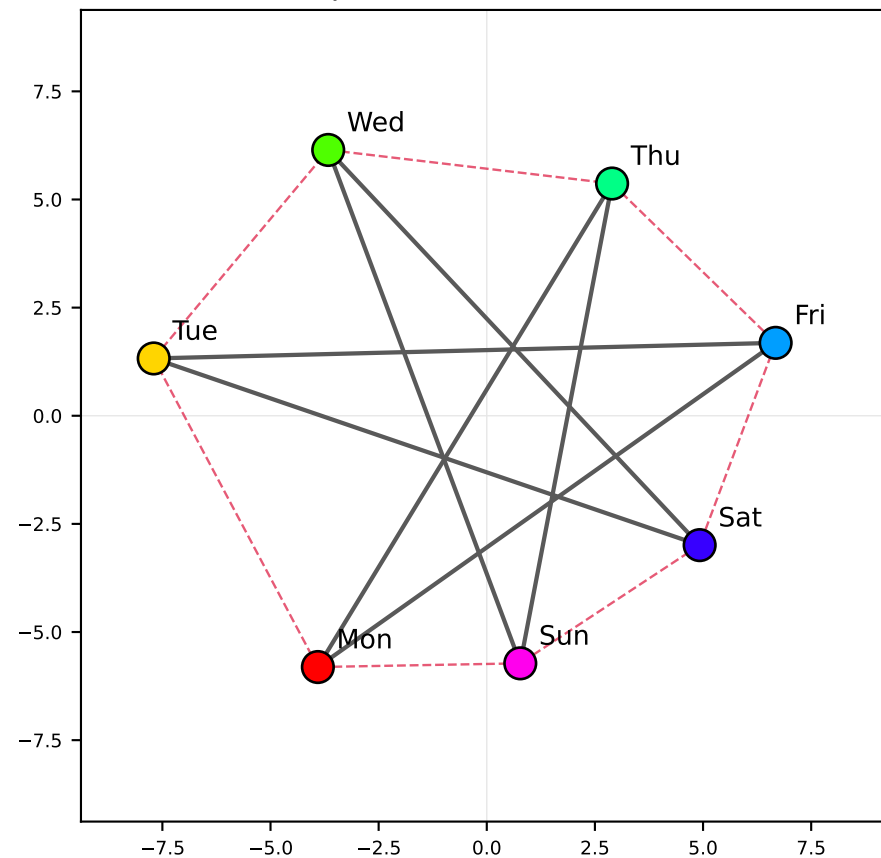

context $\approx$ 150 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 3.5% of variance

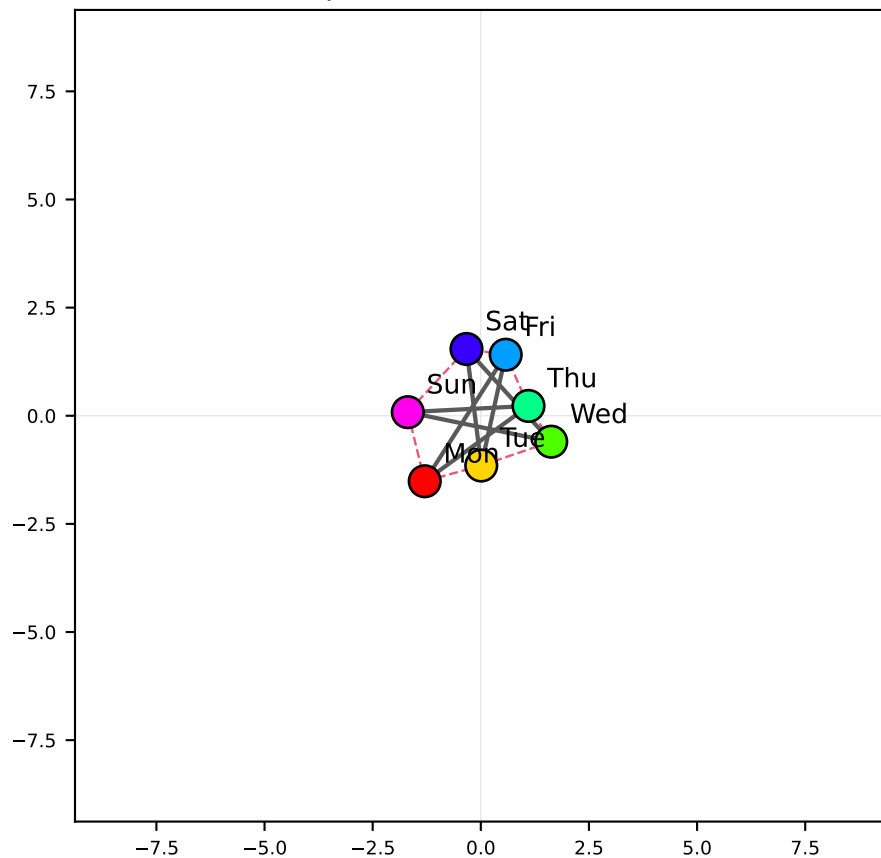

FINAL learned plane (fixed) — 53.7% of variance

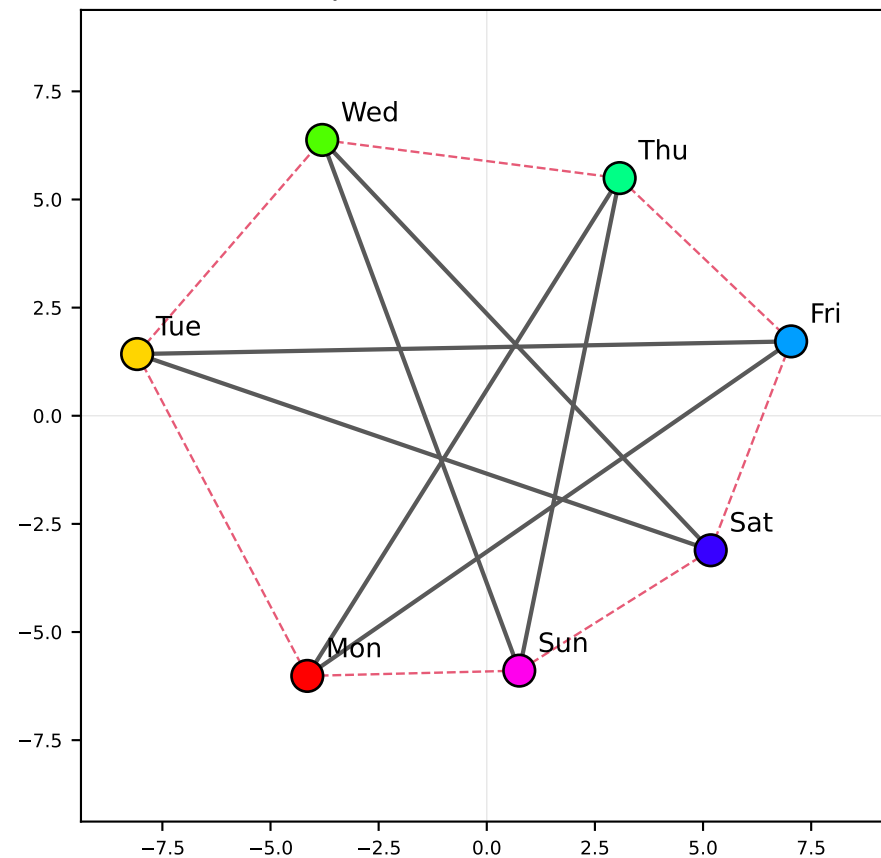

context $\approx$ 200 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 2.8% of variance

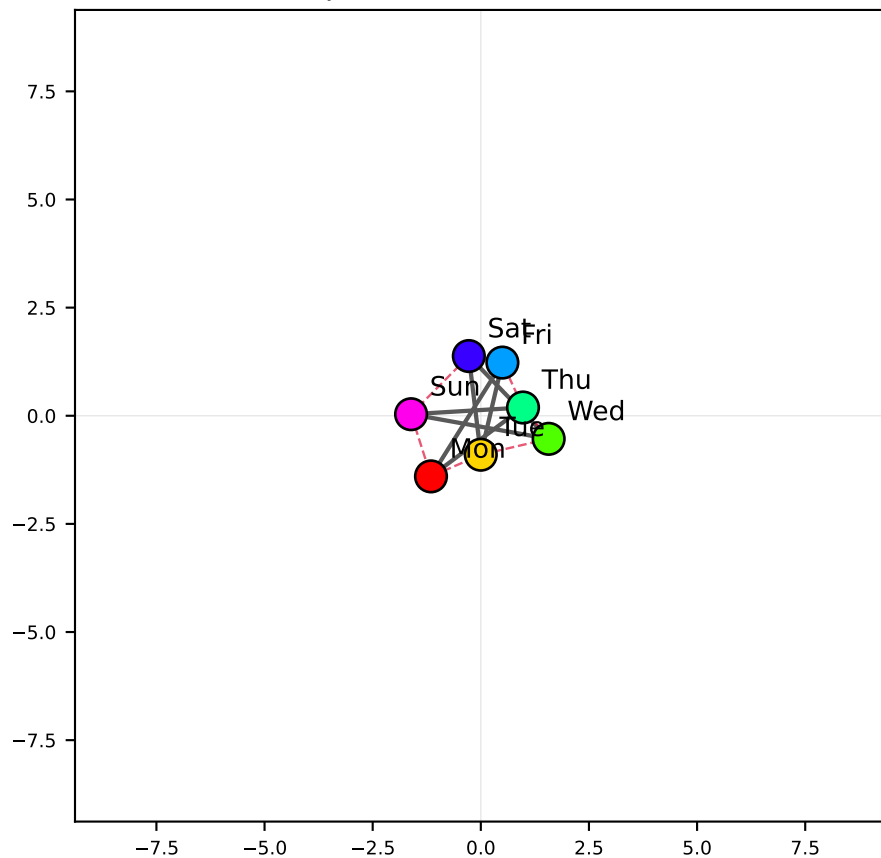

FINAL learned plane (fixed) — 55.2% of variance

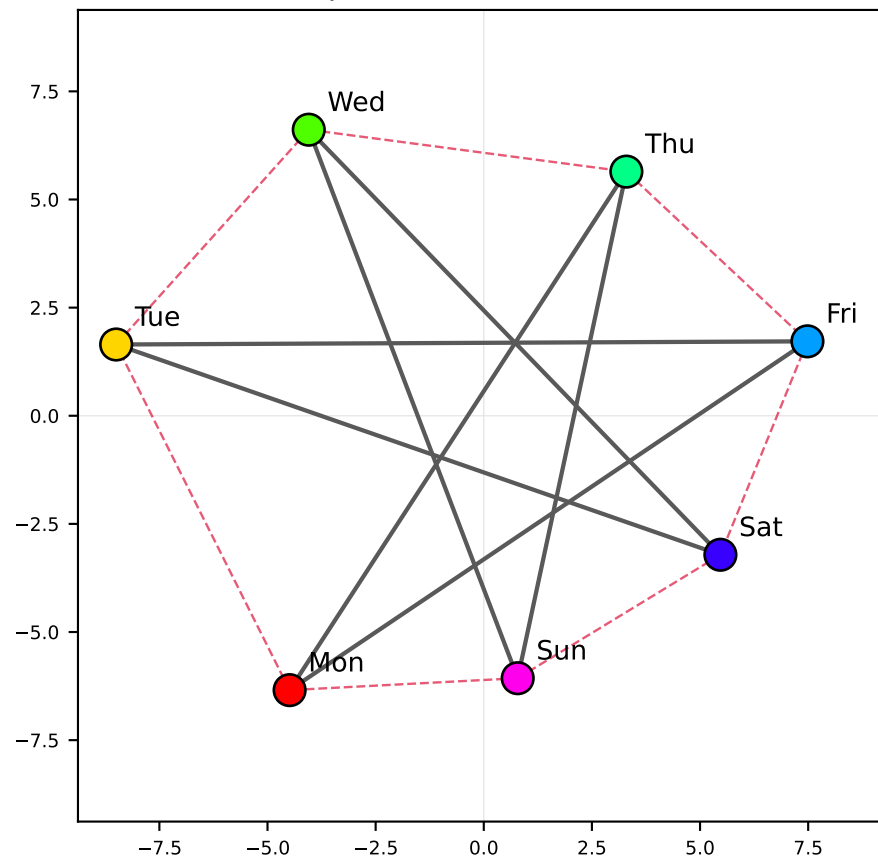

context $\approx$ 300 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 2.1% of variance

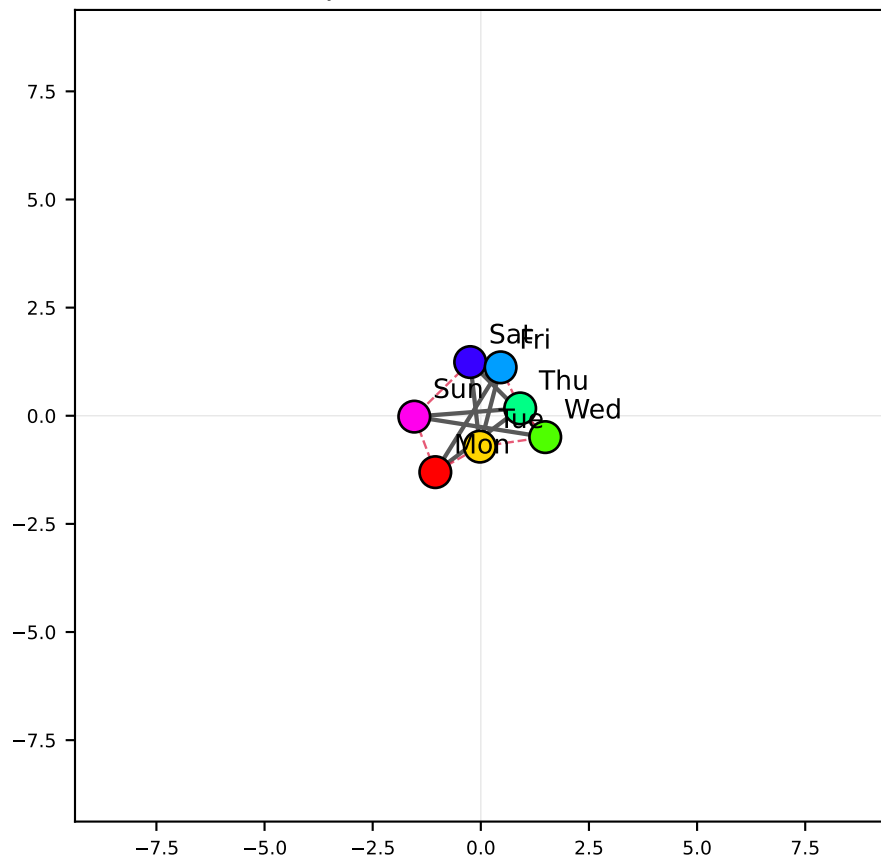

FINAL learned plane (fixed) — 56.7% of variance

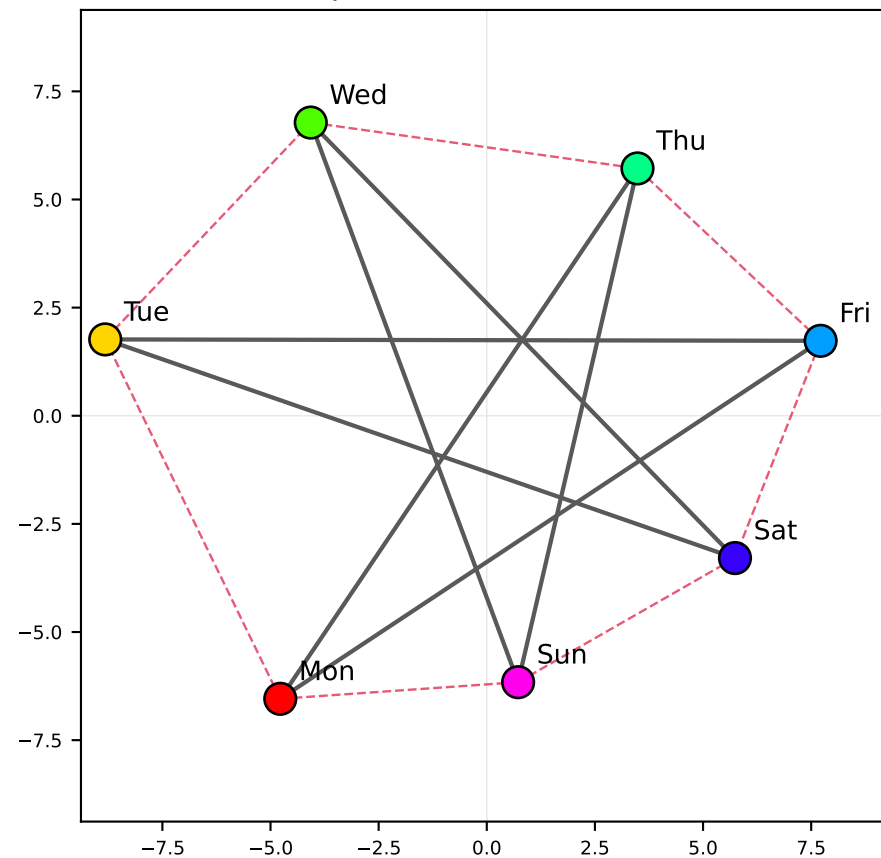

context $\approx$ 450 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 1.7% of variance

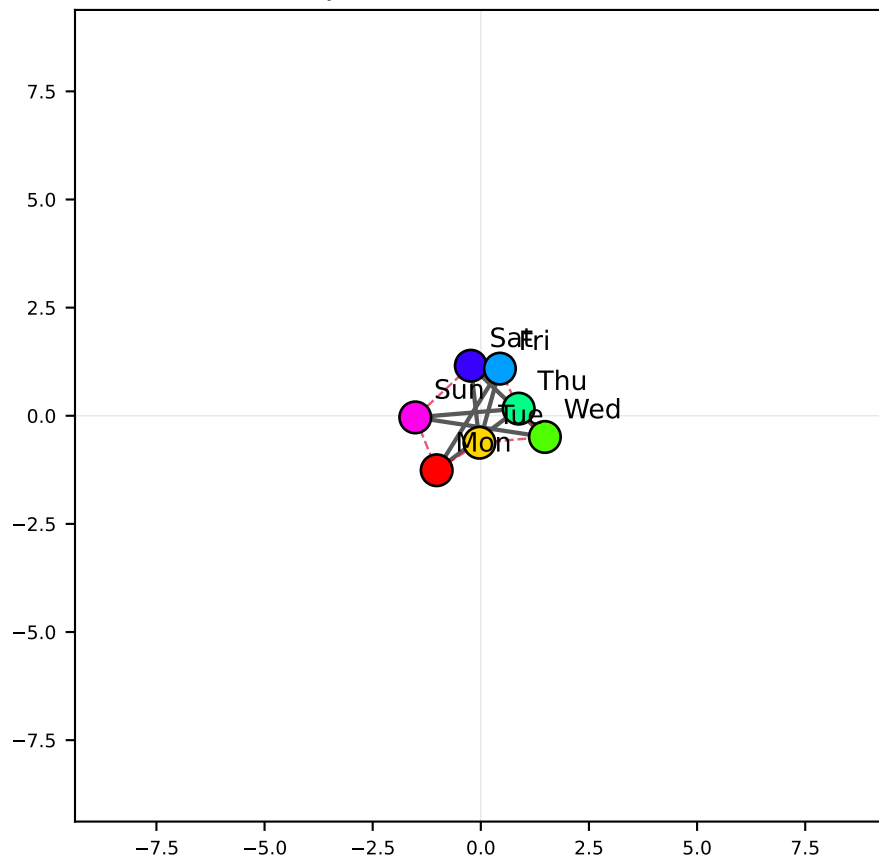

FINAL learned plane (fixed) — 57.1% of variance

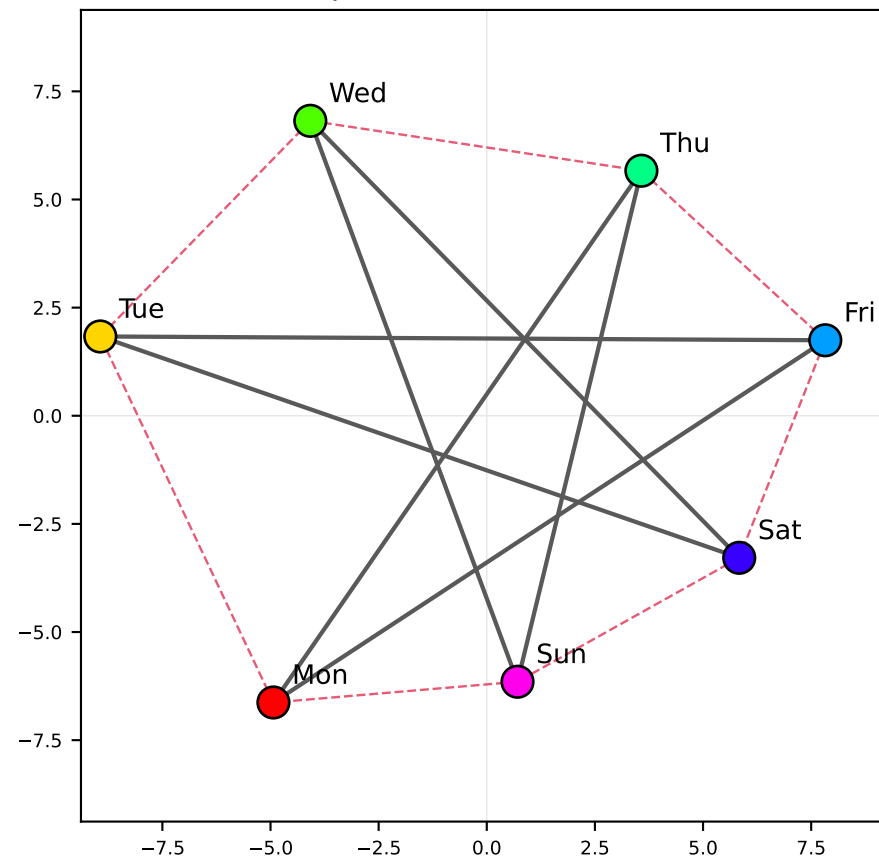

context $\approx$ 600 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

PRETRAINED plane (fixed) — 1.6% of variance

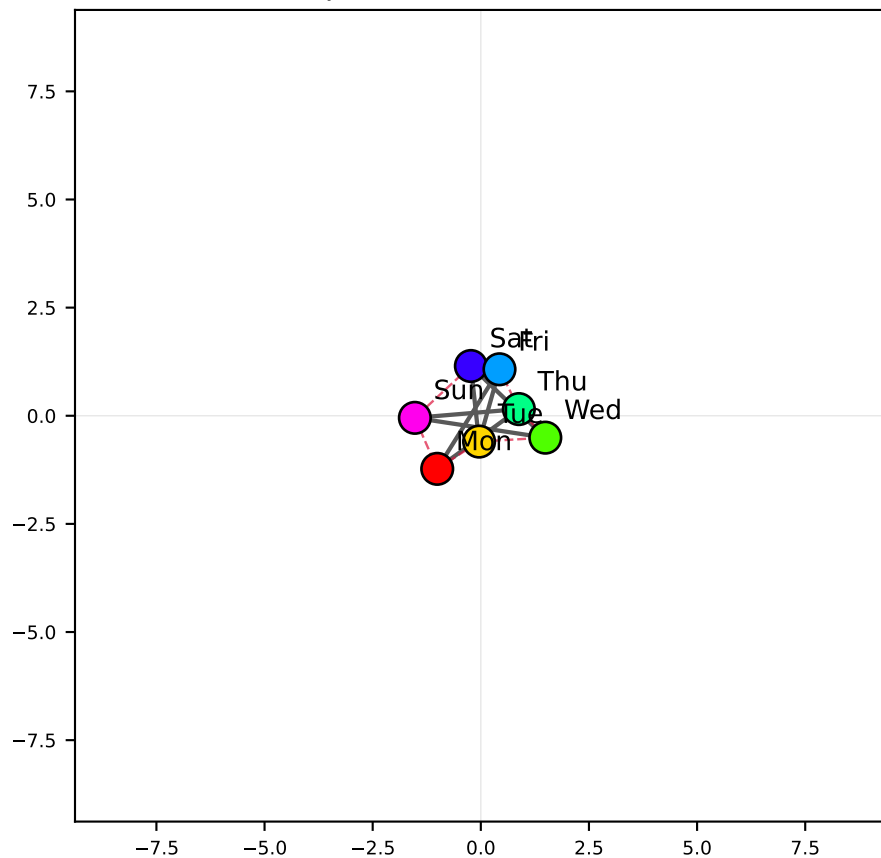

FINAL learned plane (fixed) — 57.1% of variance

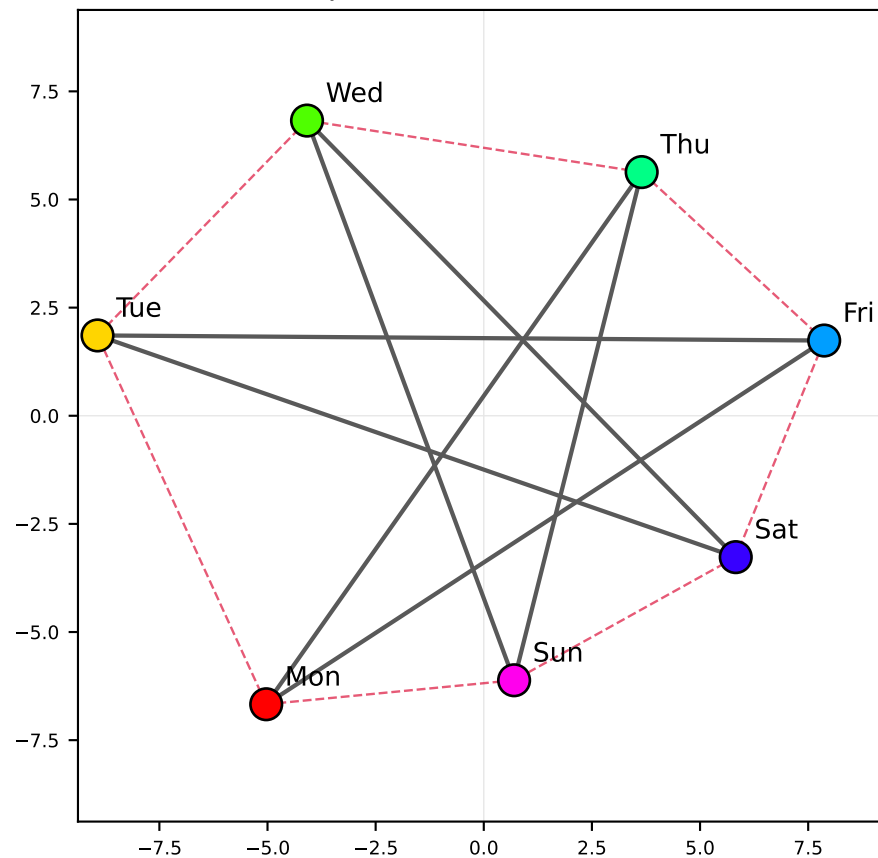

context $\approx$ 800 words (layer 26; common scale; solid: in-context edges, dashed: semantic)

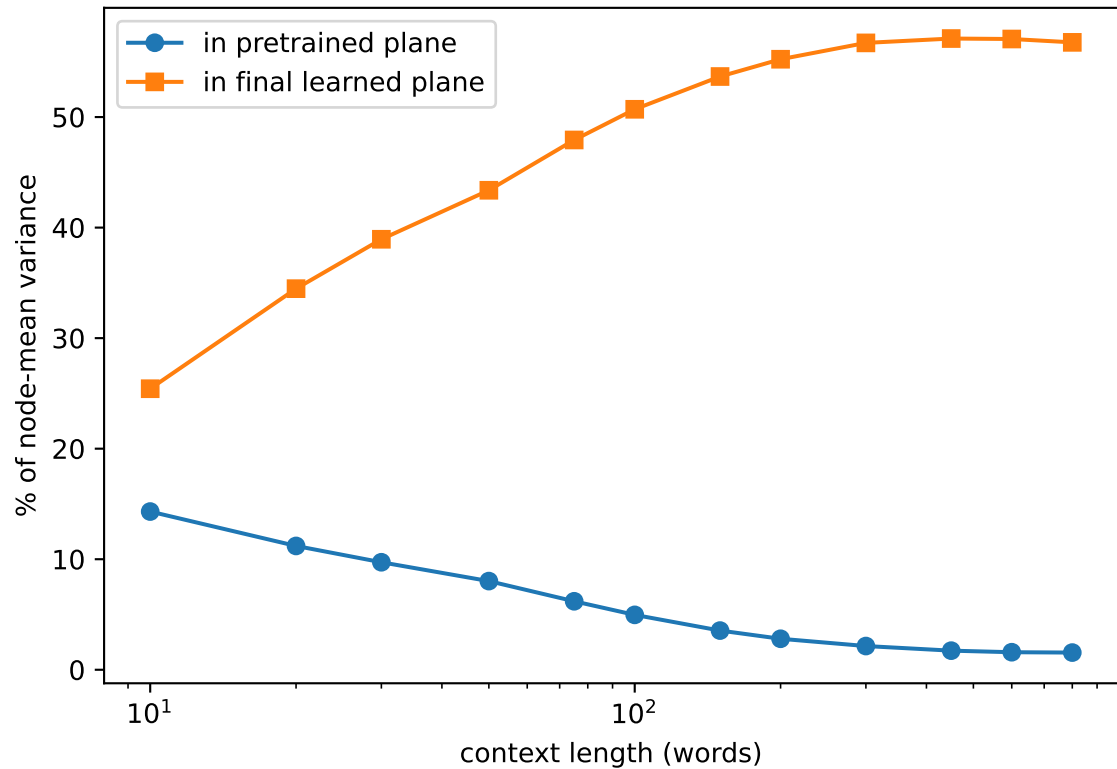

PRETRAINED plane (fixed) — 1.6% of variance

FINAL learned plane (fixed) — 56.8% of variance

the ring drains from one plane into the other

ring inflation during learning
