

Union-shape identification via Fourier modes on Z16 (layer 26); f=1 == ring/cycle, f=4 == grid column

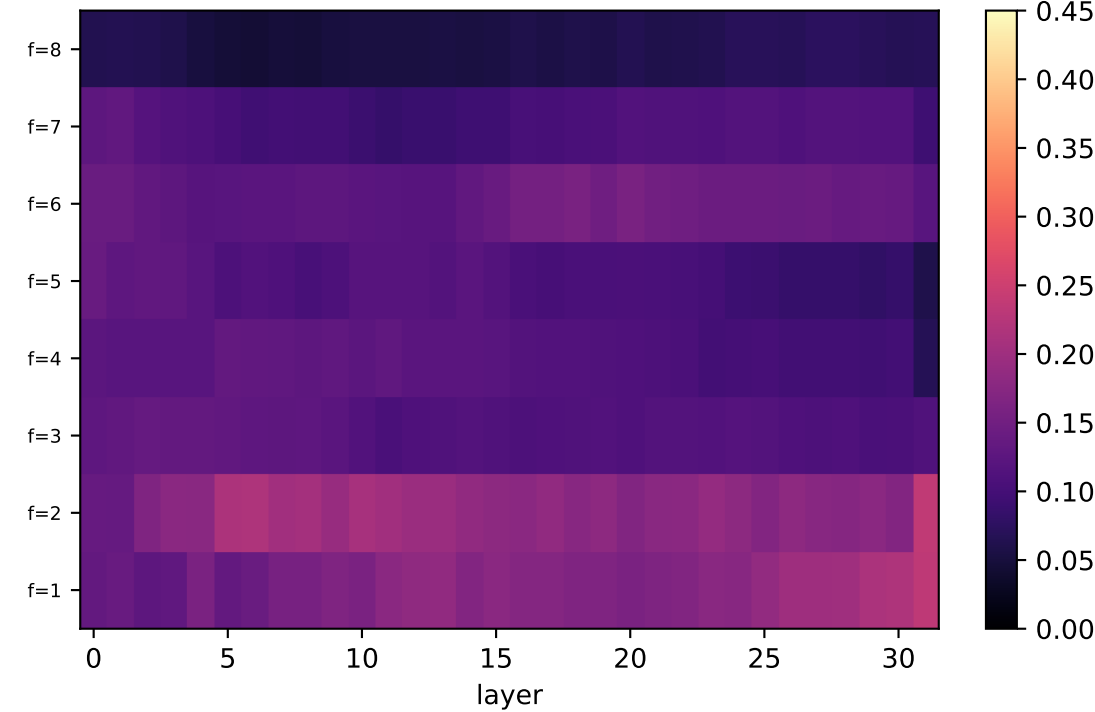

GRID-primed late: Fourier energy

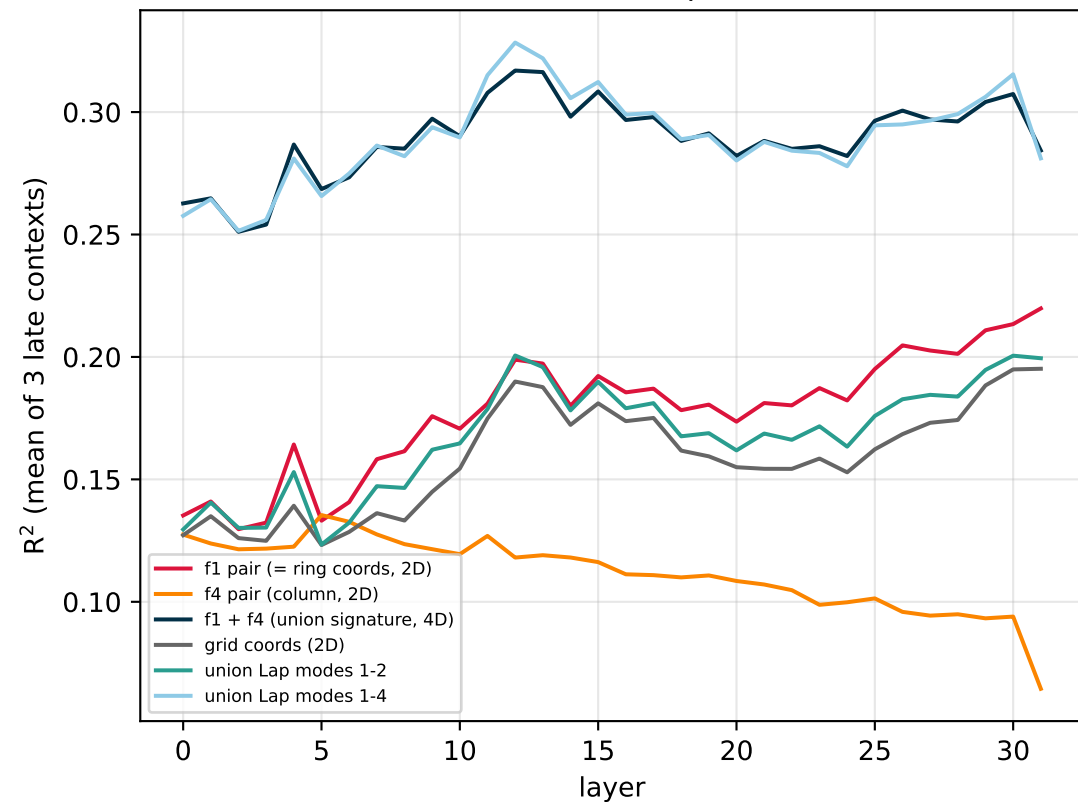

RING-primed late: Fourier energy

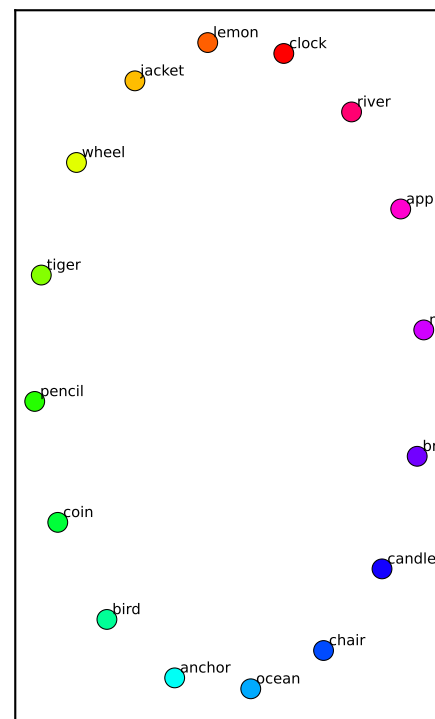

FRESH late: Fourier energy

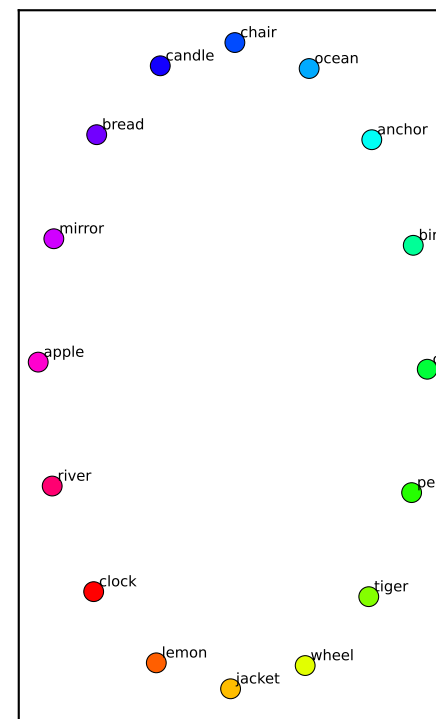

candidate subspaces

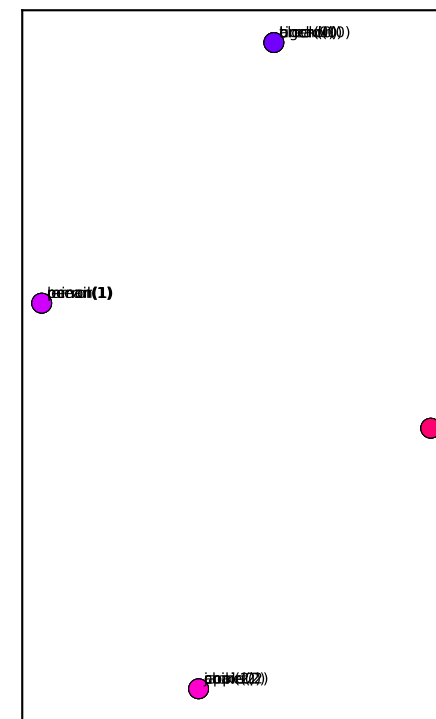

GRID-primed late
f=1 plane (cycle position)

RING-primed late
f=1 plane (cycle position)

GRID-primed late
f=4 plane (column identity)

RING-primed late
f=4 plane (column identity)
