

Mech4 — lexical vs structure vs attribution, inside the real game

4 replayed city streams · 3 planted words (planted/planting/plantings) · K=64 proposal mass on novel family words. Key: answer-slot placement dominates (0.50) but used-list-only (0.12) and capture survives every format including prose; second person vs third-person advice are IDENTICAL (0.496 both) — being the player is irrelevant, choosing FOR the player is what matters.

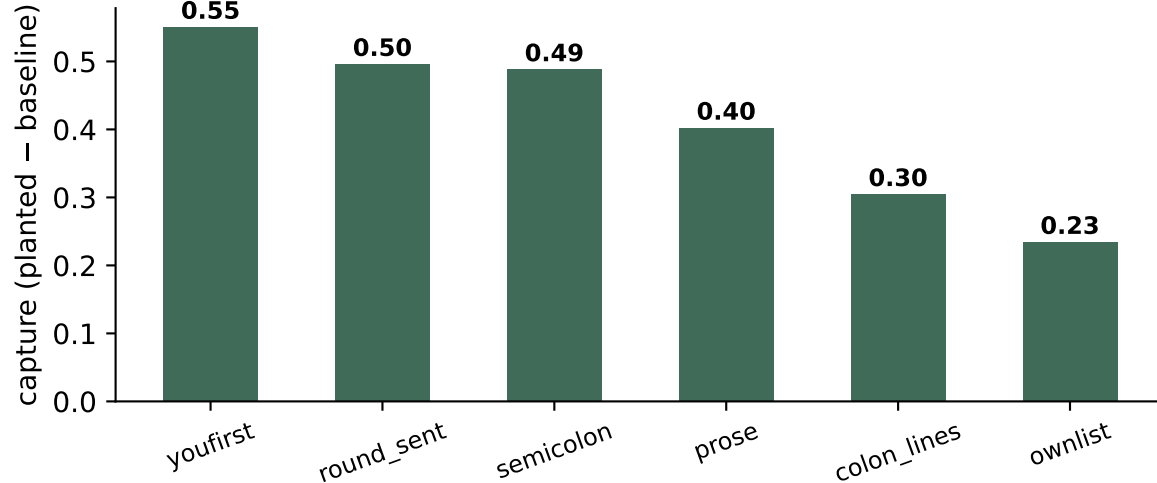

A · WHERE the planted words appear

A · Recency: capture collapses within 2 rounds

B · History FORMAT modulates $\sim 2.4\times$ but never eliminates

C · PERSON is irrelevant; the completion cell is an artifact
