

hex [v1] in-context belief-state geometry (Dirichlet posterior-predictive over next node)
 centre = uncertain (early context) -> red stars = true neighbour distributions (converged)

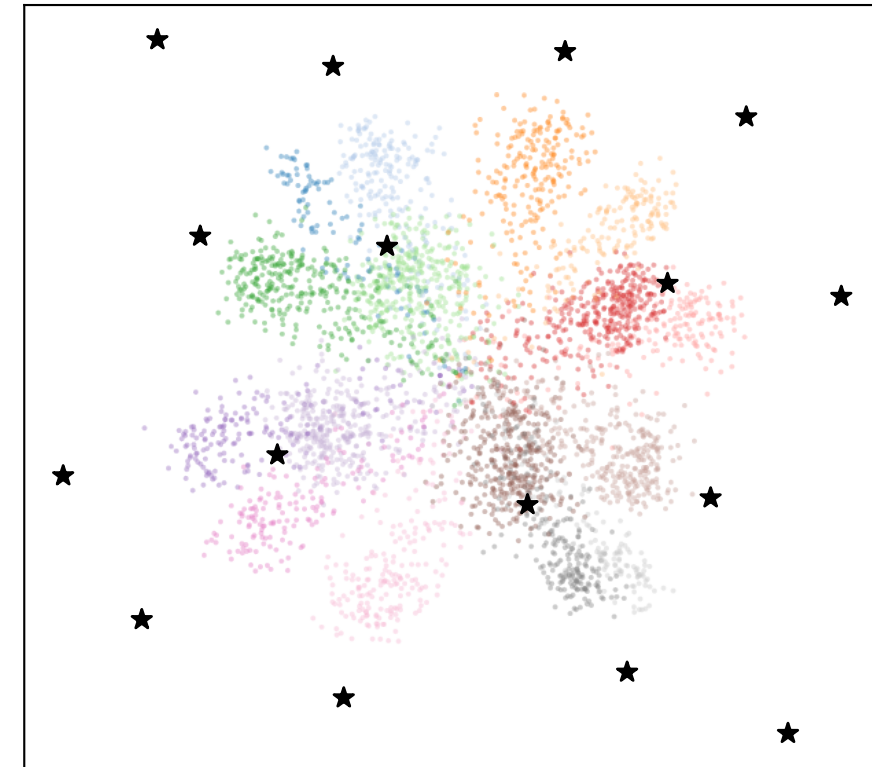

Llama L30: ground-truth belief

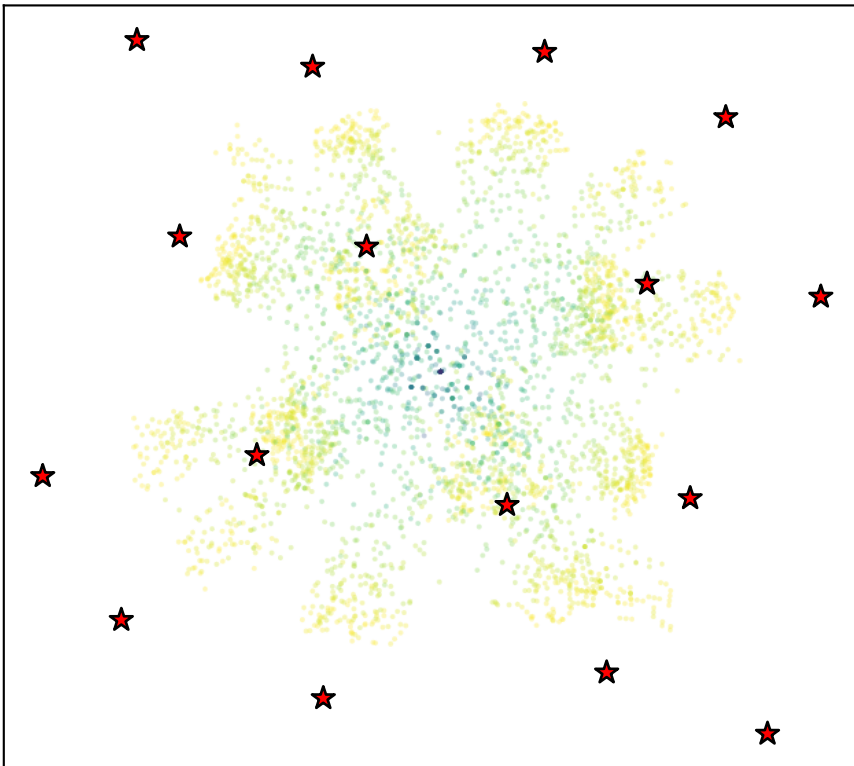

Llama L30: recovered from acts ($R^2=0.89$)

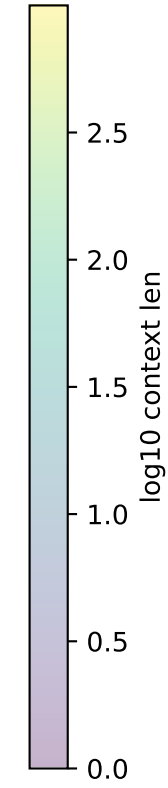

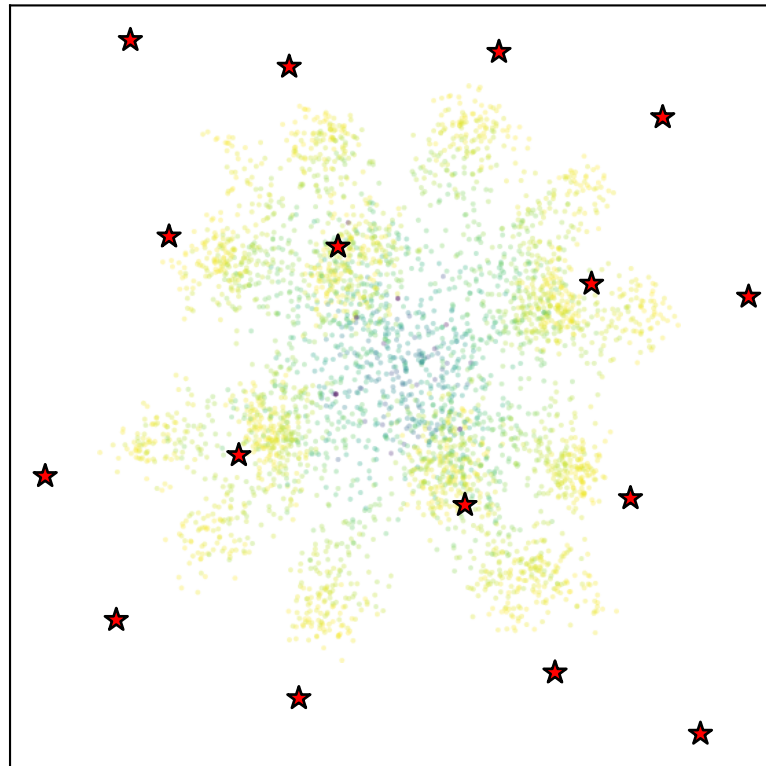

Llama: recovered, by current node

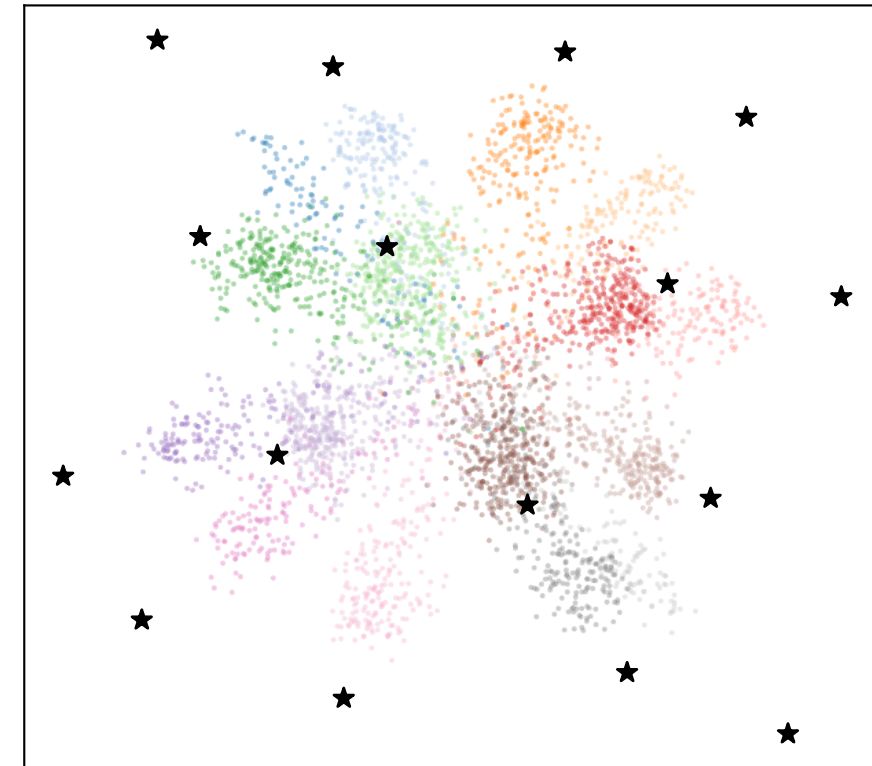

Gemma L39: ground-truth belief

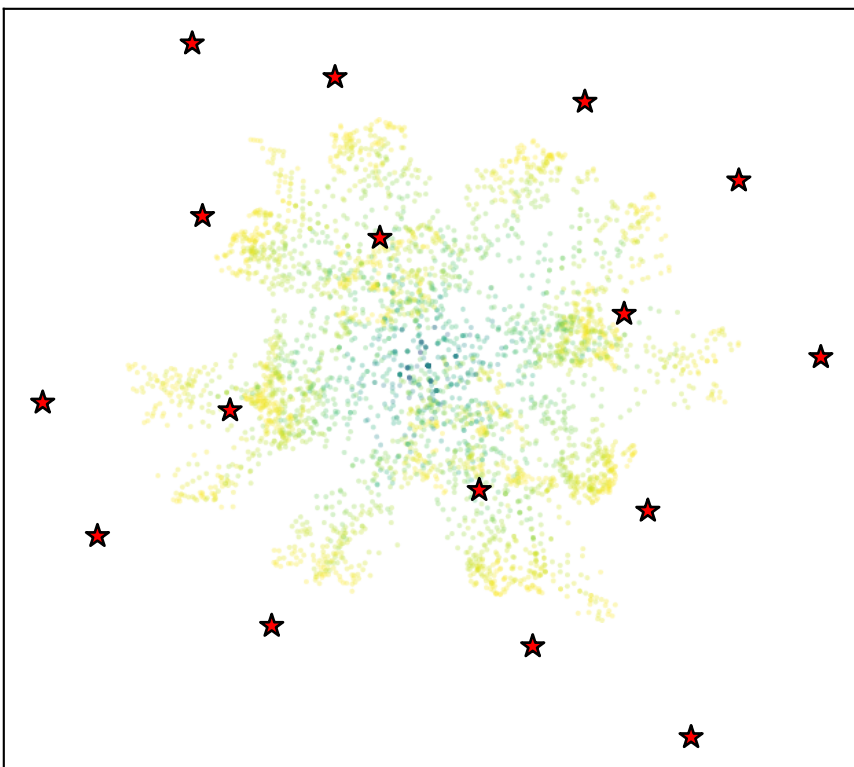

Gemma L39: recovered from acts ($R^2=0.92$)

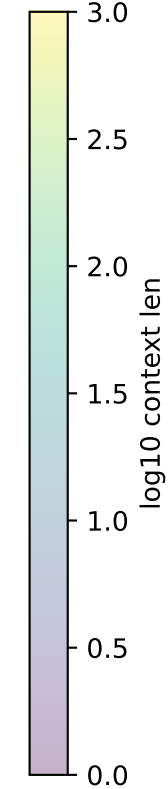

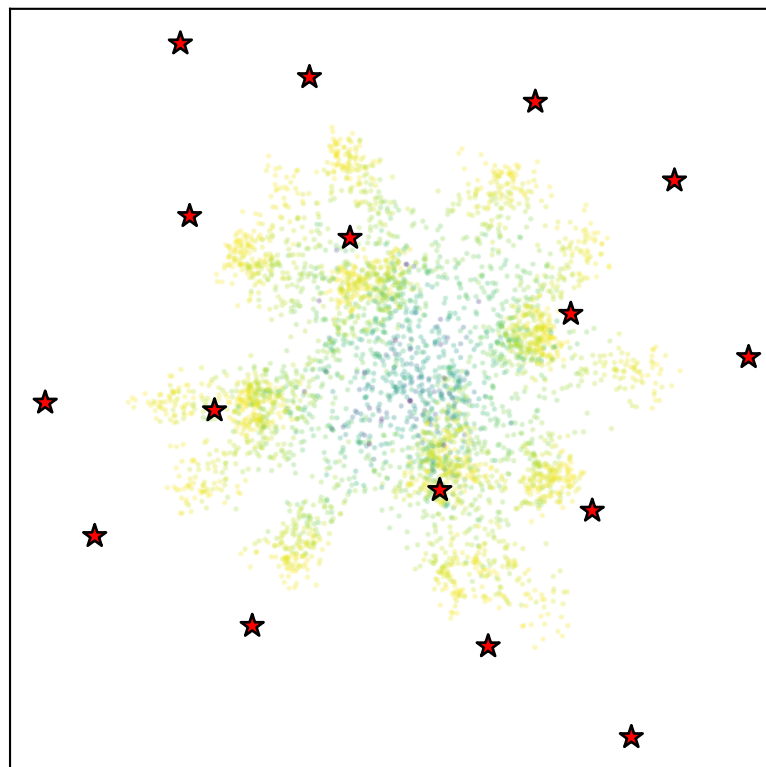

Gemma: recovered, by current node

Qwen L34: ground-truth belief

Qwen L34: recovered from acts ($R^2=0.87$)

Qwen: recovered, by current node
