

square_grid [v1] in-context belief-state geometry (Dirichlet posterior-predictive over next node)
centre = uncertain (early context) -> red stars = true neighbour distributions (converged)

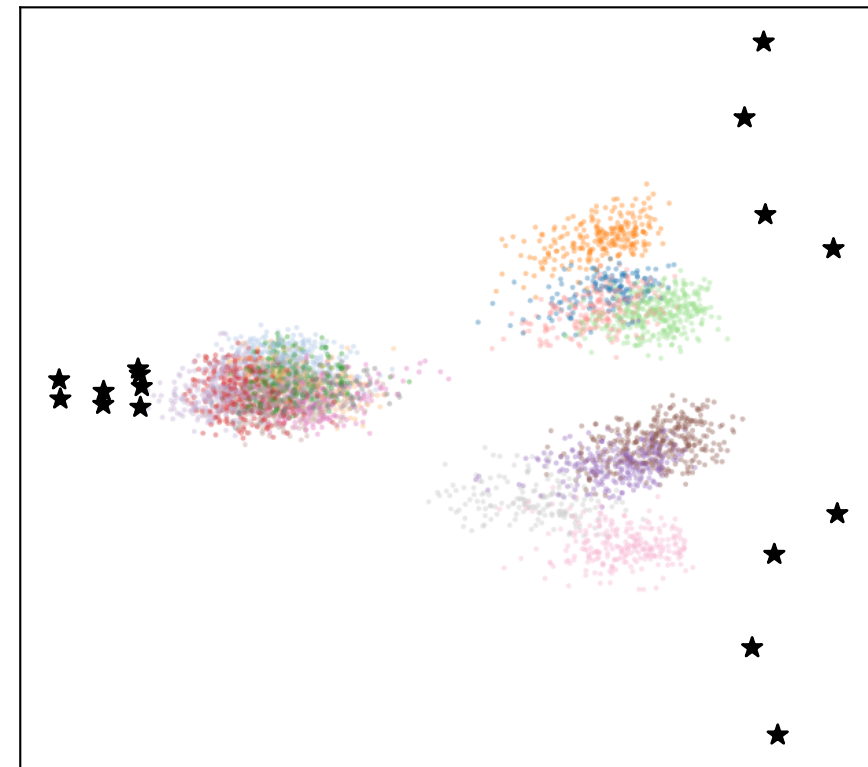

Llama L13: ground-truth belief

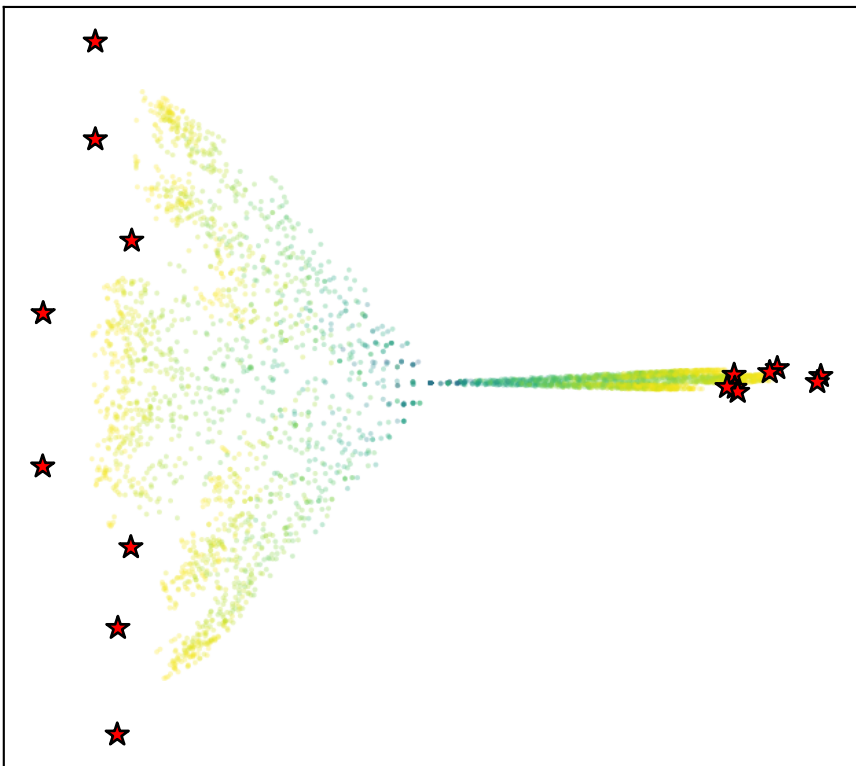

Llama L13: recovered from acts ($R^2=0.78$)

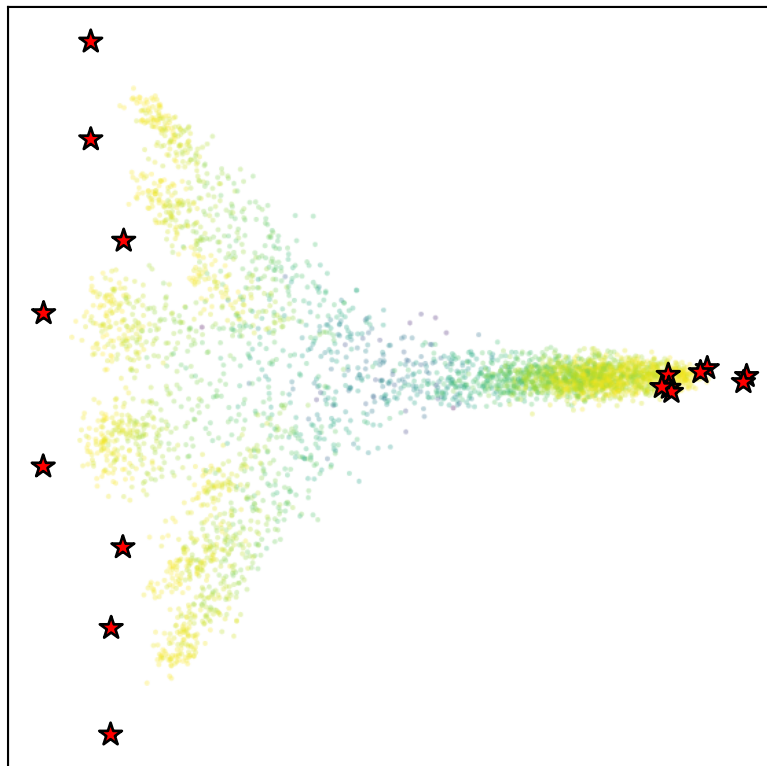

Llama: recovered, by current node

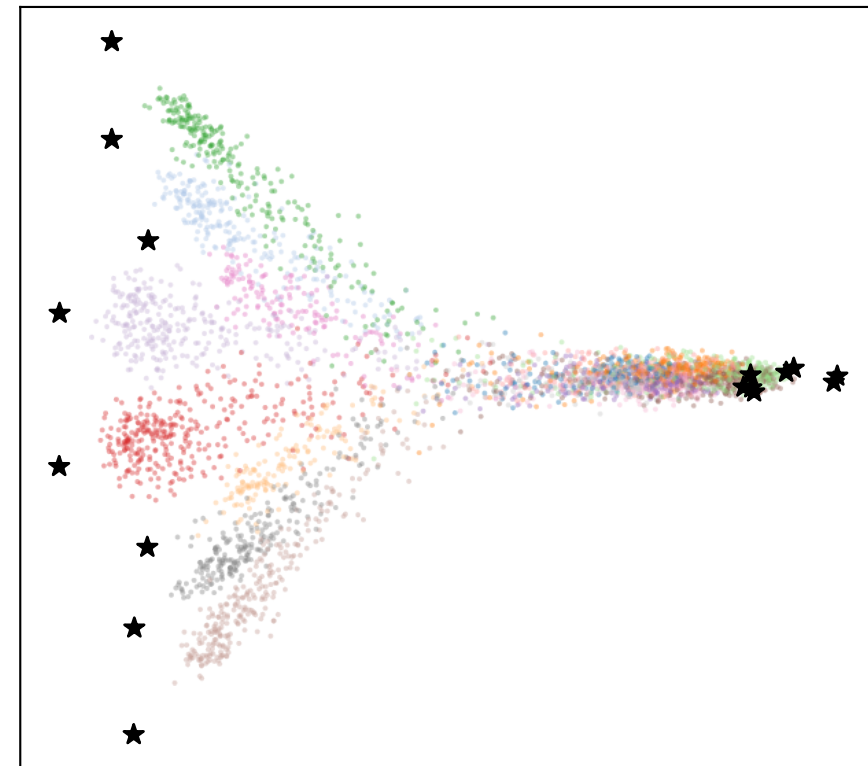

Gemma L40: ground-truth belief

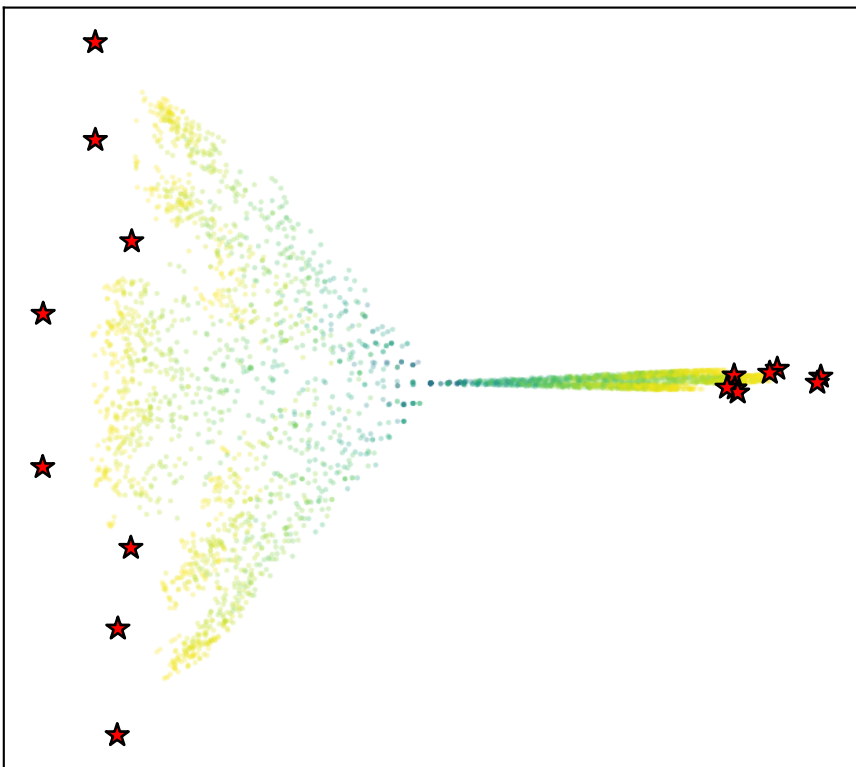

Gemma L40: recovered from acts ($R^2=0.95$)

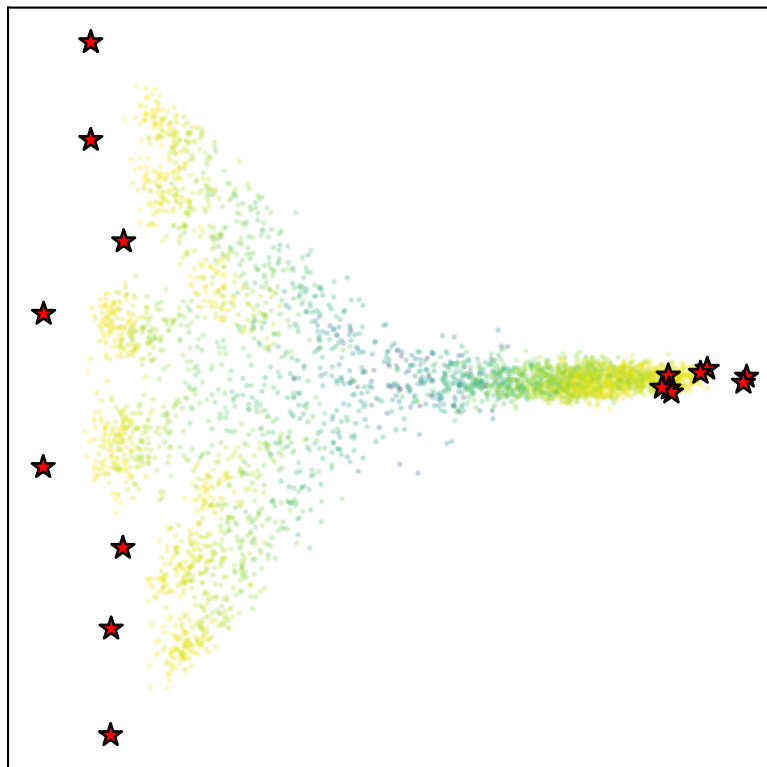

Gemma: recovered, by current node

Qwen L32: ground-truth belief

Qwen L32: recovered from acts ($R^2=0.95$)

Qwen: recovered, by current node
